

Radiant Life® Water Systems

Whole House Series Comparison Chart

Radiant Life Whole House Water Filtration Systems are designed to remove the broadest range of contaminants typically found in public water supplies.

We offer three different Series of systems in various sizes. These systems differ in the complexity and the mix of the media within each of the tanks. Selection is based on the severity of the water situation, what you are trying to remove, an assessment of your water demands and your budget.

	Series 2	Series 4	Series 6
Water Type	Municipal	Municipal	Municipal and Well
Targeted Chemicals	Chlorine, Chloramines, THM, HAA and VOC's	Chlorine, Chloramines, THM, HAA, VOC's, Fluoride and Heavy Metals	Chlorine, Chloramines, THM, HAA, VOC's, Fluoride, Heavy Metals, Iron, Hydrogen Sulfide, Bacteria, Algae and Fungi
Maximum Capacity	1,000,000 gallons	1,000,000 gallons	1,250,000 gallons
Maximum Flow Rate	25 GPM	27 GPM	27 GPM
Filtration Media	Dual Mixed Bed Carbon	Dual Mixed Bed Carbon, Sediment Base and Zeolite	Tri Mixed Bed Carbon, Sediment Base, Zeolite and KDF
