Troubleshooting

1. What should I do if the speaker cannot pair with the Bluetooth device and play music accordingly?

- Please check the specification/ the manual of the Bluetooth device (your mobile or computer), and check if the device can support the A2DP stereo audio transmission. If yes, please turn on the A2DP stereo mode.
- Ensure the speaker at the Bluetooth status, if there are many bluetooth devices around you, it may be hard to scan, then please turn off other devices.

2. What should I do if the USB flash disk cannot work?

- Ensure that the USB flash disk is in good condition. Also check that the audio files are the correct formats - MP3/WMA/WAV/APE/FLAC.
- Besides the above case, the problem maybe the compatibility of the USB flash disk. We recommend you formatting the USB Flash disk to FAT32 file formats.

3. What should I do if the speaker get stuck and all the button can not working.

The speaker's inner system may be wrong with some inappropriate operation. Please try using a needle on the reset hole next to the charging port.

4. What should I do if the speaker cannot receive the FM channels?

- Make sure the speaker is under the environment with covering the FM signal.
- To adjust the speaker direction to make the speaker with better reception
- Make sure under the FM mode, long press the ▷ button to auto search the FM channel.
